

- Full service provider of close-tolerance turned and milled parts.
- Complete project management of machining, finishing & assembly.
- Professional engineering and design support.
- Multi-stage Quality Assurance inspection program.
- Next day availability with Parts Express Program.
- 80 automated and 50 secondary machines.
- ITAR registered.
- ISO 9001:2008 certified.

MACHINING CAPABILITIES

CNC Turning

capacity: 3.125 in. / 79mm

CNC Multi-Axis Swiss Turning

capacity: 1.25 in. / 32 mm

Automatic Multi-Spindle

capacity: 1.062 in. / 27 mm

Automatic Rotary-transfer

capacity: Round stock - 0.984 in. / 25mm

Hex stock - 0.938 in. / 23.8 mm

Square stock - 0.625 in. / 15.8 mm

CNC 3-Axis Mill with Pallet Changer

capacity: 44 in. x 21 in. x 21 in. / 1,117 mm x 540 mm x 540 mm

CNC 5-Axis Mill

capacity: 5in. x 5 in. x 3 in. / 130 mm x 130 mm x 76 mm

Esco Automatic Lathe

capacity: 0.1875 in. / 4.76 mm wire

History

Enoch Precision Machining is a full-service provider of precision-machining services, specializing in close-tolerance milled and turned components. We serve a variety of industries including transportation, outdoor recreation, and medical equipment with over 80 automated and 50 secondary machines.

We've been putting our reputation on the line and into our parts since 1949. In our business, it's the little things that matter because we understand that our customers are building something great when they use Enoch parts.

Single-Source Simplicity

Our goal is simple, make it easy for you to get the parts you need when you need them. This means that we manage all aspects of manufacturing and quality assurance to simplify your part sourcing and save you time.

* Turning

* Milling

* Plating

* Heat Treating

* Laser Etching

* Lapping

* Assembly

Engineering and Design Support

Our experienced engineering team can provide assistance to optimize design elements and parts machinability. This can reduce cycle time and lower costs.

Quality Assurance

Enoch's multi-stage Quality Assurance program, including pre-run, in-process, post-run, pre-plating and post plating inspections, ensures the highest quality standards to meet your requirements.

Next Day Availability

The Enoch Parts Express Program is designed for customers who want immediate parts availability without increasing inventories. To provide this service, parts are pre-made and inventoried by Enoch based upon your pre-arranged minimum and maximum quantities. Upon notification, parts are shipped and invoiced.
